

PROFILE

Analytical profile oriented toward consulting, able to structure complex problems and generate measurable results from scratch, illustrated by **30+ project campaigns** managed end to end and a **Bitcoin data case study** (detail under Leadership & Activities). Master in Management candidate, thesis on **risk management for institutional DeFi adoption**. **Trilingual** (Spanish native, French C2, English C1), **EU citizen**, open to geographic mobility.

EDUCATION

Conservatoire National des Arts et Métiers (CNAM), Paris, France (2023 – 2026)

Master in Management, Project Management and Business Engineering

Thesis: risk management frameworks for institutional DeFi adoption, built on interviews with risk managers at **Anchorage Digital**, at **HSLU Lucerne**, a professor at **ESSEC**, and the Commercial Director of **Talos** (institutional digital asset trading platform).

Relevant coursework: Finance, Financial Accounting, Management Accounting, Managerial Behavior, Feasibility Study and Business Plan, Business Simulation, Entrepreneurship, Business Law and Contract Management.

Don Bosco International Media Academy, Paris, France (2020-2023)

Bachelor in Production Management and Budget Control

EXPERIENCE

Independent Entrepreneurship, Paris, France (2022-2025)

Founder, Project Management and Business Development

- Led **30+ campaigns** end to end under an iterative approach (scoping, short sprints, continuous prioritization): budgets, scope, cross-functional teams, vendors and schedules under tight deadlines (e.g. **TrustNoFriend**, an independent fashion brand: digital presence grown from 0 to **2,500 followers**).
- **Coordinated a team of 10 technical staff** and negotiated with technical and logistics vendors to tailor execution to each client's needs, owning the overall schedule and client communications.
- Managed **client relationships** end to end for **15+ clients** (averaging **2 engagements per client**): needs scoping, regular progress check-ins, adjustments during delivery, sustained by calm communication and a consistent quality bar.
- Structured project tracking dashboards to visualize progress, risks and milestones, and support decision-making.
- **For a collective:** strategic recommendation identifying an untapped audience (25-to-50 age segment, underserved on TikTok relative to younger users, mirroring the dynamic seen on Facebook). With no advertising budget, video reach rose from a typical **1K–10K views** to **100K–500K**, peaking at **1.9M**, building a loyal community that carried over to the collective's digital releases. Their first content deliverable reached **100,000+ YouTube views** (+400% vs. the usual ~20K).

LEADERSHIP & ACTIVITIES

Data Case Study, Bitcoin as a Store of Value. Analysis of Bitcoin's safe-haven behavior during the June 2025 Strait of Hormuz shock: extraction of 623 trading days across five assets via the Yahoo Finance API, revealing an average 30-day rolling correlation of 0.54 with the S&P 500 versus 0.15 with gold (Pearson, daily returns), with before/during/after event windowing and indices rebased to 100 for cross-asset comparability. Published as an interactive analysis: [link](#)

Team Lead, Market Simulation (CNAM). Led a team of students over eight simulated quarters, applying financial analysis and competitive strategy to market positioning decisions.

Applied AI and Automation, Python. Developed and deployed a Python Discord bot monitoring VIE postings and sending automated alerts, plus a mental-math training tool used daily for 6+ months that logs every session to track progress, and case interview prep tools. AI-assisted development with Claude Code; code on GitHub, bot hosted on Railway.

Humanitarian Volunteering, Latvia (2018, 2020). Contributed to daily life at an independent rural orphanage: building dirt pathways, cutting wood for winter, and maintaining the community farm, alongside local residents and the orphanage's young people.

Independent Digital Venture (2015). Built and monetized an independent digital project at age 15, reaching **22M+** organic views.

SKILLS & INTERESTS

- **Consulting & Strategy Methods:** structured problem-solving (MECE, Issue Tree / Profitability Framework), Value Chain Analysis, Business Model Canvas, PESTEL analysis, break-even analysis, Minto pyramid communication, SWOT analysis, data cleaning and structuring, Agile methodology (Scrum, sprints, backlog, reviews), case analysis.
- **Analytics & Data:** Excel & Google Sheets (pivot tables), SQL (PostgreSQL: joins, aggregations, subqueries), Python (Pandas, Jupyter Notebook, automation, deployed Discord bot), Tableau & Power BI (data visualization), R / RStudio, PowerShell (API ingestion, data cleaning), GitHub, VS Code, HP 12C financial calculator (NPV, IRR).
- **AI:** Claude, Gemini and Claude Code (daily); **local LLM** (Qwen 27B, LM Studio), quantization and agent tooling.
- **Certifications:** McKinsey Forward Program; Google Data Analytics Professional Certificate.
- **Languages:** Spanish (native), French (C2), English (C1). Dual Italian-Argentine nationality, full EU work authorization.
- **Interests:** competitive strategy, decentralized finance, macroeconomics, AI agents and local LLMs, piano, golf.
